General

1. When the first group of German specialists left Kuybyshev in September 1950, no change in the plant organization was made. The positions left vacant by the Germans were filled by Soviet personnel. [REDACTED] the same procedure was again followed at Zavod No. 2 after the second group of Germans [REDACTED] departed in December 1951. Beginning in the spring of 1951, a great number of Soviet personnel arrived at the plant. The influx created serious overcrowding of offices and residential quarters. [REDACTED]

25X1

[REDACTED]. They had apparently been promised, prior to being transferred to Kuybyshev, that the Germans would be evacuated before their arrival. It is very possible that the Soviets had originally planned to send back the entire group in December 1951, but the desire to have the development of the O22K finished by the Germans caused them to abolish their initial plan. It is a fact that the entire OKB staff, which was concerned with the development of this engine, is still in the USSR.
